

POWERED BY BACKBLAZE · NORWEGIAN CREATIVE MARKET

A purpose-built SaaS platform for Nordic creative professionals — **with B2 baked in.**

CreatorHub is a SaaS for photographers, videographers, event planners, and music producers in Norway and the Nordics. We've built B2 integration directly into onboarding and our upload pipelines. Now we want to launch with you as our default storage layer.

TARGET MARKET

~12,000

Norwegian creatives

B2 INTEGRATION

Live

In production

WHAT WE'VE BUILT — PRODUCTION TODAY

The B2 integration is fully implemented and deployed to **creatorhub-backend-rtbl.onrender.com**. We can demo it live on the call.

- ◆ **30-second onboarding** — users connect B2 credentials via guided flow
- ◆ **Encrypted storage** — AES-256-GCM with HKDF-derived per-user keys
- ◆ **Automatic mirroring** — uploads to galleries, marketing, and masters are mirrored to user's B2 bucket
- ◆ **6-hourly background sync** — keeps CreatorHub UI in sync with B2 state
- ◆ **Per-user dashboard** — file browser, usage stats, cost projection
- ◆ **S3-compatible** — works with B2's existing API, no special SDK needed

PRE-REVENUE ASK — TERMS THAT MATCH WHERE WE ARE

- 1 Pay-as-you-go OEM pricing** for the first 6 months — no upfront commitment while we acquire users.
- 2 90-day proof-of-concept** with ~25 TB of allocated free storage to bridge the launch period.
- 3 Phased commitment ramp** — convert to annual commit when we hit a mutually agreed user/MRR threshold.
- 4 Powered By Backblaze branding** — partner badge on creatorhubn.com, "storage powered by" in our UI from day one. Co-marketing case study at 100+ active users.
